REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art does not teach a projection optical system comprising, in combination with the additionally recited features, a plurality of reflecting surfaces, each of the surfaces having a curvature and wherein the expression: $O < (SO \times |\beta|) / S1 < 8$ is satisfied. The prior art does not teach a projection optical system comprising, in combination with the additionally recited features, a plurality of reflecting surfaces, each of the surfaces having a curvature and an aperture stop disposed closer to the image forming element than a final reflecting surface closest to the projection surface wherein an image of the aperture stop is formed between the aperture stop and the final reflecting surface. For example, Sunaga (U.S. Patent No. 6,626,541) teaches that the image of the aperture stop S_{sa} is formed between the projection surface and the final reflecting surface closest to the projection surface, not between the aperture stop and the final reflecting surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher E Mahoney whose telephone number is (571) 272-2122. The examiner can normally be reached on 8:30AM-5PM, Monday-Thursday.
